

What is a share?

A share is a unit of capital which is equity investment made in to the company by the registered share holder.

Athaurised or issued share capital-This is the number of shares that have been put on sale to the members by the company.

Paid up share capital-Actual number of shares that have been bought.

The benefits of buying shares from UNS-SACCO

1. You become a share holder.
2. You can stand for any leadership position in the organization during the annual general meeting.
3. You get a right to vote.
4. You get a share certificate which is a security document.
5. You earn dividends at year end, rate determined by the board and the more shares you have, the more dividends you can earn.
6. The loan amount is based on the share base.
7. You can get a recommendation to any embassy when processing a Visa to prove that you are an investor in your country and you still have interest in your nation (this is a new development as some members come for the embassy visa recommendation)
